Indexes to Volume 5

Authors and Titles

Anderson, W. P. *See* Kramer, D.

Arron, Geoffrey P., Day, David A., Grover, Scott D., and Laties, George G.
Effect of ethylene on the respiratory response of isolated sweet potato mitochondria 239

Aston, M. J.
Differences in the behaviour of adaxial and abaxial stomata of amphistomatous sunflower leaves: inherent or environmental? 211

Avadhani, P. N., Greenway, H., Lefroy, R., and Prior, Lynda
Alcoholic fermentation and malate metabolism in rice germinating at low oxygen concentrations 15

Begg, J. E. *See* Rawson, H. M.; Turner, Neil C.

Bennett, K. J., and Rook, D. A.
Stomatal and mesophyll resistances in two clones of *Pinus radiata* D. Don known to differ in transpiration and survival rate 231

Bhatt, Krishna. *See* Vaishnav, P. P.

Blagrove, R. J., and Gillespie, J. M.
Variability of the seed globulins of winged bean, *Psophocarpus tetragonolobus* (L.) DC. 371
Comparative studies on the proteins from seeds of *Lupinus angustifolius* L. 651

Blagrove, R. J. *See also* Gillespie, J. M.

Boland, Michael J., Fordyce, Alison M., and Greenwood, R. M.
Enzymes of nitrogen metabolism in legume nodules: a comparative study 553

Brady, C. J. *See* Thorpe, Nicolette

Bremner, P. M., and Rawson, H. M.
The weights of individual grains of the wheat ear in relation to their growth potential, the supply of assimilate and interaction between grains 61

Burch, G. J., and Johns, G. G.
Root absorption of water and physiological responses to water deficits by *Festuca arundinacea* Schreb. and *Trifolium repens* L. 859

Burch, G. J., Smith, R. C. G., and Mason, W. K.
Agronomic and physiological responses of soybean and sorghum crops to water deficits. II. Crop evaporation, soil water depletion and root distribution 169

Buttrose, Mark S.
Manganese and iron in globoid crystals of protein bodies from *Avena* and *Casuarina* 631
See also Lott, J. N. A.

Chalmers, D. J. *See* Dann, I. R.

Chinoy, J. J. *See* Vaishnav, P. P.

Clarke, A. E., Gleeson, P. A., Jermyn, M. A., and Knox, R. B.
Characterization and localization of β-lectins in lower and higher plants 707

Constable, G. A., and Hearn, A. B.
Agronomic and physiological responses of soybean and sorghum crops to water deficits. I. Growth, development and yield 159

Cook, M. G., and Evans, L. T.
Effect of relative size and distance of competing sinks on the distribution of photosynthetic assimilates in wheat 495

Coombe, Bryan G. *See* Turner, John V.

Critchley, Christa, Smillie, Robert M., and Patterson, Brian D.
Effect of temperature on photoreductive activity of chloroplasts from passionfruit species of different chilling sensitivity 443

Dann, I. R., and Chalmers, D. J.
Growth of peach [*Prunus persica* (L.) Batsch] fruits after treatment with ethephon during successive periods of fruit development 589

Day, David A. *See* Arron, Geoffrey P.

Doley, D.
Effects of shade on gas exchange and growth in seedlings of *Eucalyptus grandis* Hill ex Maiden 723

Donovan, G. R., and Lee, J. W.
Effect of the nitrogen source on grain development in detached wheat heads in liquid culture 81

Dowden, H. G. M., Lambert, Marcia J., and Truman, R.
Salinity damage to Norfolk Island pines caused by surfactants. II. Effects of sea water and surfactant mixtures on the health of whole plants 387
Downton, W. J. S., and Loveys, B. R.
Compositional changes during grape berry development in relation to abscisic acid and salinity 415
Dudman, W. F. *See* Thomson, J. A.

English, S. D. *See* Turner, N. C.
Esashi, Yohji, Tsukada, Yoshiya, and Ohhara, Yuuko
Interrelation between low temperature and anaerobiosis in the induction of germination of cocklebur seed 337
Evans, L. T. *See* Cook, M. G.

Farquhar, G. D.
Feedforward responses of stomata to humidity 787
Ferguson, I. B.
Radial movement of calcium and magnesium to the xylem in roots of *Zea mays* 433
Findlay, G. P.
Movement of the column of *Stylidium crassifolium* as a function of temperature 477
Findlay, G. P., Hope, A. B., Pitman, M. G., Smith, F. A., and Walker, N. A.
Ionic relations of the marine alga *Valoniopsis pachynema* 675
Findlay, G. P., and Pallaghy, C. K.
Potassium chloride in the motor tissue of *Stylidium* 219
Fordyce, Alison M. *See* Boland, Michael J.
Franklin, M. J. *See* Tigchelaar, E. C.
Fussell, L. K., and Pearson, Craig J.
Effect of thermal history on photosynthate translocation and photosynthesis 547

Gillespie, J. M., and Blagrove, R. J.
Isolation and composition of the seed globulins of winged bean, *Psophocarpus tetragonolobus* (L.) DC. 357
Gillespie, J. M., Blagrove, R. J., and Randall, P. J.
Effect of sulfur supply on the seed globulin composition of various species of lupin 641
Gillespie, J. M. *See also* Blagrove, R. J.
Gleeson, P. A. *See* Clarke, A. E.
Greenway, H. *See* Avadhani, P. N.
Greenwood, R. M. *See* Boland, Michael J.
Grieve, A. M., and Pitman, M. G.
Salinity damage to Norfolk Island pines caused by surfactants. III. Evidence for stomatal penetration as the pathway of salt entry to leaves 397
Grover, Scott D. *See* Arron, Geoffrey P.

Hall, A. J., and Milthorpe, F. L.
Assimilate source–sink relationships in *Capsicum annuum* L. III. The effects of fruit excision on photosynthesis and leaf and stem carbohydrates 1
Hatch, M. D., and Oliver, I. R.
Activation and inactivation of phospho*enol*pyruvate carboxylase in leaf extracts from C_4 species 571
Hawker, John S., and Walker, Robert R.
Effect of sodium chloride on expansion rates and invertase activity of leaves 73
Hearn, A. B. *See* Constable, G. A.; Turner, N. C.
Hocking, P. J. *See* Pate, J. S.
Hope, A. B. *See* Findlay, G. P.

Ivory, D. A., and Whiteman, P. C.
Effect of temperature on growth of five subtropical grasses
I. Effect of day and night temperature on growth and morphological development 131
II. Effect of low night temperature 149

Jenner, C. F., and Rathjen, A. J.
Physiological basis of genetic differences in the growth of six varieties of wheat 249
Jermyn, M. A.
Comparative specificity of concanavalin A and the β-lectins 687
Isolation from the flowers of *Dryandra praemorsa* of a flavonol glycoside that reacts with β-lectins 697
See also Clarke, A. E.
Johns, G. G.
Transpirational, leaf area, stomatal and photosynthetic responses to gradually induced water stress in four temperate herbage species 113
Johns, G. G. *See also* Burch, G. J.
Jones, Russell L. *See* Paull, Robert E.

Knox, R. B. *See* Clarke, A. E.
Kramer, D., Anderson, W. P., and Preston, J.
Transfer cells in the root epidermis of *Atriplex hastata* L. as a response to salinity: a comparative cytological and X-ray microprobe investigation 739

Kuo, J. *See* Pate, J. S.

Lambert, Marcia J. *See* Dowden, H. G. M.; Truman, R.
Lang, Alexander
A model of mass flow in the phloem 535
Interactions between source, path and sink in determining phloem translocation rate 665
Laties, George G. *See* Arron, Geoffrey P.
Lee, J. W.
Influence of nitrogen source on nitrogen metabolism in detached wheat heads 779
See also Donovan, G. R.
Leece, D. R.
Foliar absorption in *Prunus domestica* L. I. Nature and development of the surface wax barrier 749
Lefroy, R. *See* Avadhani, P. N.
Lessani, H., and Marschner, H.
Relation between salt tolerance and long-distance transport of sodium and chloride in various crop species 27
Lott, J. N. A., and Buttrose, Mark S.
Globoids in protein bodies of legume seed cotyledons 89
Loveys, B. R. *See* Downton, W. J. S.

Mander, Lewis N. *See* Turner, John V.
Marschner, H. *See* Lessani, H.
Mason, W. K. *See* Burch, G. J.
May, P. *See* Scholefield, P. B.
McGlasson, W. B. *See* Tigchelaar, E. C.
Millerd, Adele, Thomson, J. A., and Schroeder, H. E.
Cotyledonary storage proteins in *Pisum sativum*. III. Patterns of accumulation during development 519
Milthorpe, F. L. *See* Hall, A. J.; Thorpe, Nicolette; Willmer, C. M.
Minchin, Peter E. H. *See* Pickard, William F.

Neales, T. F., and Nicholls, A. O.
Growth responses of young wheat plants to a range of ambient CO_2 levels 45
Neales, T. F. *See also* Scholefield, P. B.
Nicholls, A. O. *See* Neales, T. F.
Nicholls, P. B.
Response of barley shoot apices to application of gibberellic acid: initial response pattern 311
Response of barley shoot apices to application of gibberellic acid and abscisic acid: dependence on tissue sensitivity 581
Nulsen, R. A., and Thurtell, G. W.
Osmotically induced changes in the pressure–flow relationships of maize root systems 469

Ohhara, Yuuko. *See* Esashi, Yohji
Oliver, I. R. *See* Hatch, M. D.
Osmond, C. B. *See* Powles, S. B.

Paleg, L. G. *See* Robinson, S. P.
Pallaghy, C. K. *See* Findlay, G. P.
Pate, J. S., Kuo, J., and Hocking, P. J.
Functioning of conducting elements of phloem and xylem in the stalk of the developing fruit of *Lupins albus* L. 321
Patterson, Brian D., Paull, Robert, and Smillie, Robert M.
Chilling resistance in *Lycopersicon hirsutum* Humb. & Bonpl., a wild tomato with a wide altitudinal distribution 609
Patterson, Brian D. *See also* Critchley, Christa

II. Glycinebetaine and proline accumulation in two salt- and water-stressed barley cultivars 817
IV. Comparison of salt stress in *Spartina* × *townsendii* and three barley cultivars 839
Wyn Jones, R. G. *See also* Storey, R.

Subject Index

Abscisic acid
  Compositional changes during grape berry development in relation to 415
  Response of barley shoot apices to application of 581
Acacia conferta, globoids in protein bodies from cotyledons of 89
Arachis hypogaea, enzymes of nitrogen metabolism in nodules of 553
Araucaria heterophylla, salinity damage to, caused by surfactants I, II, III 377, 387 397
Atriplex hastata, transfer cells in the root epidermis of, as a response to salinity 739
Avena sativa, manganese and iron in globoid crystals of protein bodies from 631

Barley
  Comparison of salt stress in *Spartina* × *townsendii* and three cultivars of 839
  Glycinebetaine and proline accumulation in two salt- and water- stressed cultivars of 817
  Ion relations of two salt- and water-stressed cultivars of 801
  Response of shoot apices to application of gibberellic acid 311
  Response of shoot apices to application of gibberellic acid and abscisic acid 581
Bean, see *Phaseolus vulgaris*
Bean, winged, see *Psophocarpus tetragonolobus*

C_4 species, activation and inactivation of phospho*enol*pyruvate carboxylase in leaf extracts from 571
Capsicum annuum
  Assimilate source–sink relationships in. III 1
  Relation between salt tolerance and long-distance transport of sodium and chloride in 27
Cassia artemisioides, globoids in protein bodies from cotyledons of 89
Casuarina cunninghamiana, manganese and iron in globoid crystals of protein bodies from 631
Casuarina littoralis, manganese and iron in globoid crystals of protein bodies from 631
Casuarina muelleriana, manganese and iron in globoid crystals of protein bodies from 631
Cenchrus ciliaris, effect of temperature on growth of I, II 131, 149
Chloris gayana, effect of temperature on growth of I, II 131, 149
Chloroplasts
  Effect of indoleacetic acid on CO_2 fixation, electron transport and phosphorylation in 425
  Effect of temperature on photoreductive activity of, from passionfruit species of different chilling sensitivity 443
Clianthus formosus, globoids in protein bodies from cotyledons of 89
Cocklebur, interrelationship between low temperature and anaerobiosis in the induction of germination of 337
Commelina, carbon dioxide fixation in attached and detached epidermis of 767
Cress, relation between salt tolerance and long distance transport of sodium and chloride in 27
Cuscuta
  Loading of assimilates and some sugars into the translocation system of 851

Dryandra praemorsa, isolation from the flowers of, of a flavonol glycoside that reacts with β-lectins 697

Ethylene, effect of, on respiratory response of sweet potato mitochondria 239
Eucalyptus grandis, effects of shade on gas exchange and growth of seedlings of 723

Festuca arundinacea
  Root absorption of water and physiological responses to water deficits by 859
  Transpirational, leaf area, stomatal and photosynthetic responses to gradually induced water stress in 113

Grape
  Compositional changes during development of berries, in relation to abscisic acid and salinity 415
Galega officinalis, enzymes of nitrogen metabolism in nodules of 553
Germination
  Of cocklebur, interrelationship between low temperature and anaerobiosis 337
  Of rice at low oxygen concentrations 15
Gibberellic acid
  Activity of, and molecular structure II 347
  Response of barley shoot apices 311
  Response of barley shoot apices to application of 581

Glycine max
Agronomic and physiological responses to water deficits. I, II, III, IV 159, 169, 179, 195
Enzymes of nitrogen metabolism in nodules of 553
Globoids in protein bodies from cotyledons of 89
Glycinebetaine
Accumulation in two salt- and water-stressed barley cultivars 817
Effect of salinity on levels of, in *Spartina* × *townsendii* 831
Gramineae, salt stress and comparative physiology in. I, II, III, IV 801, 817, 831, 839

Helminthosporic acid, further studies on analogues of 347

Invertase activity of leaves, effect of sodium chloride on 73
Ipomoea alba L., transient inhibition of translocation in, by small temperature reductions 127

β-Lectins
Characterization and localization of, in lower and higher plants 707
Comparative specificity of concanavalin A and 687
Isolation from the flowers of *Dryandra praemorsa* of a flavonol glycoside that reacts with 697
Lolium perenne, transpirational, leaf area, stomatal and photosynthetic responses to gradually induced water stress in 113
Lotus pedunculatus, enzymes of nitrogen metabolism in nodules of 553
Lupinus albus
Effect of sulfur supply on the seed globulin composition of 641
Functioning of conducting elements of phloem and xylem in the stalk of the developing fruit 321
Lupinus angustifolius
Comparative studies on the proteins from seeds of 651
Effect of sulfur supply on the seed globulin composition of 641
Enzymes of nitrogen metabolism in nodules of 553
Lupinus cosentinii, effect of sulfur supply on the seed globulin composition of 641
Lupinus elegans, effect of sulfur supply on the seed globulin composition of 641
Lupinus luteus, effect of sulfur supply on the seed globulin composition of 641
Lupinus mutabilis, effect of sulfur supply on the seed globulin composition of 641
Lycopersicon esculentum, natural and ethephon-stimulated ripening of F_1 hybrids of the ripening inhibitor and non-ripening mutants of 449
Lycopersicon hirsutum, chilling resistance in 609

Macroptilium atropurpureum, enzymes of nitrogen metabolism in nodules of 553
Maize, see *Zea mays*
Medicago sativa, enzymes of nitrogen metabolism in nodules of 553
Mitochondria, from sweet potato, effect of ethylene on respiratory response of 239

Nitrate reductase activity in relation to dwarfism in *Sorghum bicolor* 39

Ornithopus compressus, enzymes of nitrogen metabolism in nodules of 553

Panicum coloratum var. *makarikariense*, effect of temperature on growth of I, II 131, 149
Panicum maximum var. *trichoglume*, effect of temperature on growth of I, II 131, 149
Passionfruit, effect of temperature on photoreductive activity of chloroplasts from 443
Peach, see *Prunus persica*
Pennisetum americanum, effect of thermal history on photosynthate translocation and photosynthesis in 547
Pennisetum clandestinum, effect of temperature on growth of I, II 131, 149
Phalaris tuberosa, transpirational, leaf area, stomatal and photosynthetic responses to gradually induced water stress in 113
Phaseolus vulgaris
Enzymes of nitrogen metabolism in nodules of 553
Inhibition of the capacity and efficiency of photosynthesis in leaflets of, under illumination in a CO_2-free atmosphere at low oxygen 619
Relation between salt tolerance and long-distance transport of sodium and chloride in 27
Phloem, a model of mass flow in the 535
Phospho*enol*pyruvate carboxylase, activation and inactivation of 571
Photorespiration, a possible role for 619

Photosynthesis
Effect of thermal history on 547
Effects of fruit excision on, in *Capsicum annuum* 1
Inhibition of the capacity and efficiency of, in bean leaflets illuminated in a CO_2-free atmosphere at low oxygen 619
Response to gradually induced water stress in four temperate herbage species 113
Pine, Norfolk Island, see *Araucaria heterophylla*
Pine, radiata see *Pinus radiata*
Pinus radiata
Stomatal and mesophyll resistance in two clones of 231
Water uptake by mycorrhizal roots of 301
Pisum sativum
Cotyledonary storage proteins in. I, II, III 263, 281, 519
Effects of indoleacetic acid on CO_2 fixation, electron transport and phosphorylation in chloroplasts of 425
Enzymes of nitrogen metabolism in nodules of 553
Regulation of assimilate movement into ovules of 295
Potato, sweet, effect of ethylene on respiratory response of mitochondria from 239
Proline
Accumulation in two salt- and water-stressed barley cultivars 817
Effect of salinity on levels of, in *Spartina* × *townsendii* 831
Prunus domestica, foliar absorption in. I 749
Prunus persica, growth of fruits after treatment with ethephon during successive periods of fruit development 589
Psophocarpus tetragonolobus
Isolation and composition of the seed globulins of 357
Variability of the seed globulins of 371

Radiata pine, see *Pinus radiata*
Rice
Adaptive importance of mesocotyl and coleoptile growth in, under different moisture regimes 511
Alcoholic fermentation and malate metabolism in, during germination at low oxygen concentrations 15

Safflower, relation between salt tolerance and long-distance transport of sodium and chloride in 27
Salinity
Compositional changes during grape berry development in relation to 415
Effect of, upon ion relations and glycinebetaine and proline levels in *Spartina* × *townsendii* 831
Effect of sodium chloride on expansion rates and invertase activity of leaves 73
Relation between salt tolerance and long-distance transport of sodium and chloride 27
Sorghum, see *Sorghum bicolor*
Sorghum bicolor
Agronomic and physiological responses to water deficits I, II, III, IV 159, 169, 179, 195
Nitrate reductase in, in relation to dwarfism 39
Osmotic adjustment of, in response to water deficits and its influence on the water potential at which stomata close 597
Soybean, see *Glycine max*
Spartina × *townsendii*
Comparison of salt stress in, and three barley cultivars 839
Effect of salinity on ion relations and glycinebetaine and proline levels in 831
Spinacea oleracea, effects of indoleacetic acid on CO_2 fixation, electron transport and phosphorylation in chloroplasts of 425
Stomata
Carbon dioxide fixation in attached epidermis of *Commelina* 767
Feedforward responses of, to humidity 787
Primary carboxylation and enzyme activities in 485
Stylidium crassifolium, movement of the column of, as a function of temperature 477
Stylidium, potassium chloride in motor tissue of 219
Sugar beet, relation between salt tolerance and long-distance transport of sodium and chloride in 27
Sunflower
Differences in behaviour of adaxial and abaxial stomata of leaves of 211
Osmotic adjustment of, in response to water deficits and its influence on the water potential at which stomata close 597
Relation between salt tolerance and long-distance transport of sodium and chloride in 27

Sycamore, regulation of synthesis and secretion of fucose-containing polysaccharides in cultured cells of 457

Tomato, see *Lycopersicon esculentum*
Translocation
A model of mass flow in the phloem 535
Effect of thermal history on 547
Functioning of conducting elements of phloem and xylem in the stalk of developing fruits of *Lupinus albus* L. 321
Interactions between source, path and sink in determining rate of 665
Loading of assimilates and some sugars into the translocation system of *Cuscuta* 851
Transient inhibition in *Ipomoea alba* L. by small temperature reductions 127
Transpiration, response to gradually induced water stress in four temperate herbage species 113
Trifolium repens
Enzymes of nitrogen metabolism in nodules of 553
Root absorption of water and physiological responses to water deficits by 859
Transpirational, leaf area, stomatal and photosynthetic responses to gradually induced water stress in 113
Trifolium subterraneum, enzymes of nitrogen metabolism in nodules of 553

Valoniopsis pachynema, ionic relations of 675
Vicia faba, globoids in protein bodies from cotyledons of 89
Vitis vinifera, carbon balance of, and effects of autumn defoliation by harvest-pruning 561

Wheat
Effect of nitrogen source on grain development in detached heads in liquid culture 81
Effect of relative size and distance of competing sinks on distribution of photosynthetic assimilates 495
Influence of nitrogen source on nitrogen metabolism in detached heads of 779
Growth responses of, to a range of ambient CO_2 levels 45
Physiological basis of genetic differences in growth of six varieties of 249
The weights of individual grains of the ear of, in relation to their growth potential, the supply of assimilate and interaction between grains 61

Zea mays
Osmotically induced changes in the pressure–flow relationship of roots of 469
Radial movement of calcium and magnesium to the xylem in roots of 433
Relation between salt tolerance and long-distance transport of sodium and chloride in 27
